OPERATION: ZOMBIE DEFENSE PROTOCOL

Objective: Secure Hackster University Campus, neutralize reanimated threats, and establish a fortified stronghold for survivor safety.

Phase 1: Reconnaissance and Campus Lockdown

1. Secure the Perimeter:

- Designate teams for each campus entry point.
- Establish defensive positions to monitor and control access.
- Utilize campus surveillance systems for real-time intelligence.

2. Gather Intel:

- Deploy scout teams to assess the threat level and identify key enemy concentrations.
- Monitor radio frequencies for potential distress calls or enemy movement reports.

3. Lockdown Procedures:

- Coordinate with student teams to implement lockdown measures in all buildings.
- Barricade windows and reinforce doors to create defensible positions.

Phase 2: Offensive Cyber Measures

1. Cyber Warfare Unit:

- Form a dedicated team to exploit campus technology for defensive purposes.
- Override and control key infrastructure to gain a strategic advantage.

2. Communication Network:

- Establish secure communication channels between teams for efficient coordination.
- Monitor enemy communications to anticipate and counter their movements.

Phase 3: Resource Procurement and Survivor Aid

1. Supply Acquisition:

- Identify essential supplies (food, medical supplies, weapons) and locate their storage areas.
- Assign teams to secure supply points while maintaining constant vigilance.

2. Medical Triage:

- Establish a medical team to provide immediate aid to injured survivors.
- Prioritize medical supplies for critical cases.

3. Evacuation Planning:

- Develop contingency plans for potential evacuation routes and safe zones.
- Coordinate with the Biohazard management team for assistance and extraction if required.

Phase 4: Zombie Neutralization and Fortification

1. Zombie Elimination Teams:

- Form combat teams equipped with melee and ranged weapons.
- Clear designated areas of reanimated threats systematically.

2. Fortify Safe Zones:

- Strengthen barricades and fortifications around safe zones.
- Establish lookout positions for early detection of approaching threats.

Phase 5: Continual Vigilance

1. Continuous Monitoring:

- Maintain constant surveillance on all fronts.
- Rotate teams for rest and recovery to ensure peak performance.

2. Intel Updates:

- Regularly update the situation report with current intel and threat assessments.
- Adapt strategies based on evolving circumstances.

Caution: Trust in your team, communicate effectively, and adapt to the dynamic nature of the threat. Success depends on unity, resourcefulness, and the ability to outsmart the undead adversaries.
